

Active 10 TREK

Available from:

- www.satmap.com
- www.natgeomaps.com
- www.amazon.com

SRP \$369.99

Active 10 TREK comes pre-loaded with

- World Base Map: Collins Bartholomew 1:5 million to 1:30 million
- USA Base Map: National Geographic 1:1 million World Atlas

- **Easy to use, rugged & reliable** handheld sports GPS with large 3.5" screen
- **Displays topographical mapping** such as National Geographic, Ordnance Survey & IGN
- **Shows key statistics** including total ascents, distance, time and speed
- **Long battery life** (up to 100 hours in hibernate mode)
- **High quality accessories** – Bike & Vehicle Mounts, Slimline Back & LiPol, Deluxe Case
- **Easy route creation** on the GPS handset or a computer, with rapid transfer between them.

What's Unique?

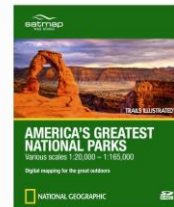

- **Largest screen** available with red light filter for night use (3.5" LCD TFT Colour 320 x 240px)
- **One handed gloved use** - deliberately NOT touch screen - firm button press for rugged use.
- **Best clarity of mapping** as you zoom through different layers.
- **Most power options** of all GPS – including easily obtainable AA battery option.
- **Largest selection of topographical mapping** – US, Great Britain, France, Germany, Italy, Switzerland, Austria, Belgium, Republic of Ireland, Netherlands, Spain, New Zealand...

US Mapping

Topographical or raster mapping is available on SD Cards which slot into the Active 10 GPS.

US mapping:

- National Geographic TOPO!
- National Geographic Trails Illustrated
- National Geographic Adventure – coming soon...

International Mapping is available for UK, France, Germany, Italy, Switzerland, Austria, Belgium, Republic of Ireland, Netherlands, Spain, New Zealand...more to follow.

- Support for Pocket Queries
- Ability to import pictures & descriptions to your unit

Accessories

High-quality accessories and power options enhance the Satmap experience:

Bike Mount Kit

SRP \$24.99

Robust mount for fixing the Active 10 to handle bars or frame – two mechanical failures in over 2 years which says it all! Includes Bike Mount & Battery Back.

Vehicle Mount

SRP \$19.99

The Vehicle Mount has been designed for using the Active 10 TREK in vehicles and is suitable for any windscreen, or flat smooth surface. Especially suitable for off-road vehicles where navigation on accurate topographical mapping is a must.

Slimline Battery Back & 1500mAh Rechargeable LiPol Battery

SRP \$24.99

Reduce the profile and weight of the Active 10 by a third. With the Slimline Back & LiPol rechargeable battery (9-13hrs battery life) the GPS will fit easily in your pocket. Power the battery with the chargers that come free with Active 10 TREK.

Solar Power Bundle

SRP \$69.99

The Satmap Solar Power Bundle includes a 2200mAh powermonkey-eXplorer Portable Charger and a Solar Panel. Suitable for use with the Active 10 TREK and other 5 Volt portable electronic devices, this versatile combination provides essential power even in remote locations - Available December 2010.

ProSHIELD

SRP \$34.99

Silicon rubber protective casing for increased impact protection - drop tested to 10 feet on concrete. Additional protection against water & dust. Buttons are fully functional with gloves whilst in the case. Available in black, orange, sand or green.

Screen Covers

SRP \$14.99

Pack of 3 spare Screen Covers. Simply unclip the old screen cover and replace with a new one! Your map screen will never be obscured by scratches.

ZAGG invisible SHIELD

SRP \$14.99

ZAGG's invisibleSHIELD is an exceptionally clear and virtually indestructible film that will protect your GPS from scratches. The precision pre-cut ZAGG applies directly to the Active 10 providing toughest, durable protection.

Deluxe Carry Case

SRP \$14.99

The Deluxe Case has a main padded compartment for the Active 10 and a smaller section for storing spare batteries, map cards, or keys. The case can be carried by the 4" belt loop in the back or via the D-Ring fittings on each side.

The Ultimate GPS

Recommended by leading European outdoor journalists:

Our Customers

The Active 10 was first launched into Europe where there are tens of thousands of customers using the GPS to enhance the enjoyment and safety of their outdoor sports. The Active 10 TREK is also a **great work tool** providing location and route information as well as the option to plot Points of Interest, Areas of Interest, and Grids.

The Active 10 is used by
over 50 European
Mountain
Rescue Teams

About Satmap

The Active 10 is designed and engineered by people who love outdoor sports. The industry told us it wasn't possible to put detailed topographical mapping, like National Geographic, onto a GPS. It took a lot of development and innovation but we achieved it. And that makes your outdoor sports safer and a lot more fun!

Satmap is a British company founded by two ex-military guys. The head office is in Surrey in the UK and the company plans to open a US office in Colorado very soon.

Our mission:

To lead the industry in GPS and mapping – and be the first to bring you exciting new features & functionality. Satmap only partners with the best mapping providers in each country.
